

Web Development

Peter Ezzat Aziz

Agenda

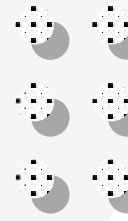

- Front-End Development
- Database Design
- Back-End Development

What You See

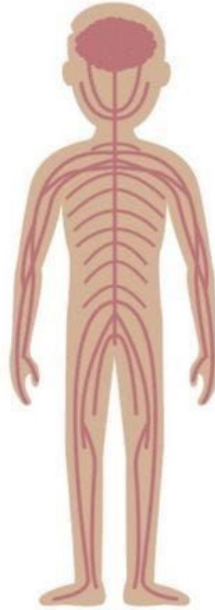

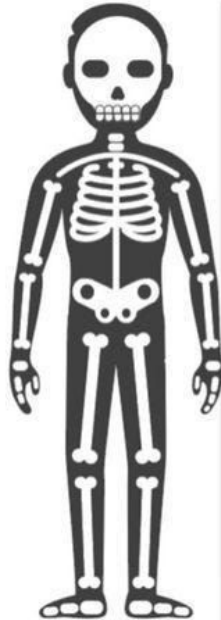

- Front-End is what people experience
 - It's color, structure, interaction.
- 
- 

Front-End

HTML

JS

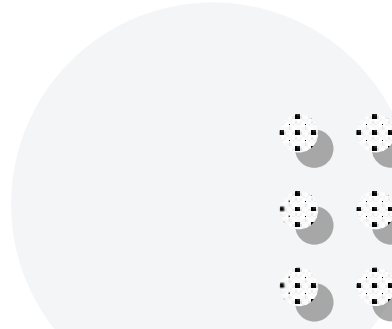

CSS

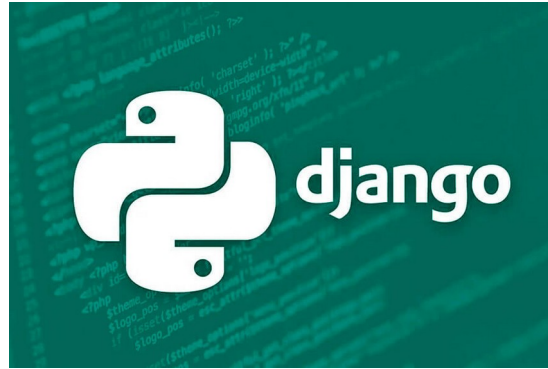

What You Don't See

- Back-End is the logic behind the curtain.
 - It processes, secures, and delivers.
- 
- 

Back-End

The BRAIN

- Databases are memory.
 - They hold everything.
- 

Databases

ORACLE

Why It All Matters?

// They inter-connect
and provides all of
your needs.

//

One Web, Many Devices

Q&A Session

Thank You...
